

# AI Meeting Scheduler Agent

## *Home Page Documentation Report*

### 1. Introduction

This document describes the design and functionality of the Home Page of the AI Meeting Scheduler Agent. The homepage acts as the main interface between the user and the system. It provides an overview of features, working process, and user interaction options.

### 2. Purpose of the Home Page

- To introduce the AI Meeting Scheduler Agent.
- To explain how the system works.
- To display core features and benefits.
- To allow users to start scheduling meetings.
- To provide navigation to other modules like dashboard or login.

### 3. Home Page Sections

- Hero Section – Displays project title, short description, and action buttons (Schedule Meeting, Try Demo).
- How It Works Section – Explains AI workflow including calendar analysis and conflict detection.
- Features Section – Highlights key features like smart suggestions, reminders, and dashboard access.
- Natural Language Demo Section – Demonstrates how users can schedule meetings using text commands.
- Call to Action Section – Encourages users to start using the system.
- Footer Section – Contains copyright and basic information.

### 4. UI/UX Design Description

The homepage uses a modern responsive layout built with HTML and CSS. It includes gradient backgrounds, interactive buttons, card-based feature display, and mobile responsiveness. The design ensures clarity, simplicity, and user-friendly navigation.

## 5. Technologies Used for Home Page

Component	Technology Used
Structure	HTML5
Styling	CSS3
Responsiveness	CSS Grid / Media Queries
Interactivity (Optional)	JavaScript

## 6. Conclusion

The homepage of the AI Meeting Scheduler Agent successfully provides an attractive and informative interface for users. It explains system functionality clearly and guides users toward scheduling meetings efficiently. The design supports future integration with backend AI modules and calendar APIs.
